Reviewer Comments:

Body Mass Index (BMI)

<input type="checkbox"/>	The school has conducted an analysis of the School Level Body Mass Index screening data.
--------------------------	---

Develop a brief narrative of student BMI trends based on the analysis of the data.

More than half the boys and girls tested in the healthy/underweight category range. The boys tested 11.8% in the overweight category and 22.5% in the obese category. The girls showed approximately 65.8% in the healthy/underweight category and 22.8% in the overweight category with 11.4% in the obese category.

It is noted that there is decrease in the overweight category with boys. The girls had an increase in the overweight category. There was a decrease in the obese category for both boys and girls.

Other Health and Wellness Related Data (Optional)

Develop a brief narrative of other health and wellness data. (Optional)
